DATA ANALYTICS PORTFOLIO PROJECT

Maven Fuzzy Factory

E-commerce analytics in Excel + Power BI

473K sessions · 32K orders · Mar 2012 – Mar 2015

Where does the funnel leak, which channels carry the business,

and where do refunds concentrate? Swipe →

THE BUSINESS AT A GLANCE

Three years of an online toy store, in six numbers

$1.94M
Gross revenue

$1.85M
Net revenue (after refunds)

$1.13M
Gross profit

61.02%
Gross margin (on net revenue)

6.83%
Conversion rate (orders ÷ sessions)

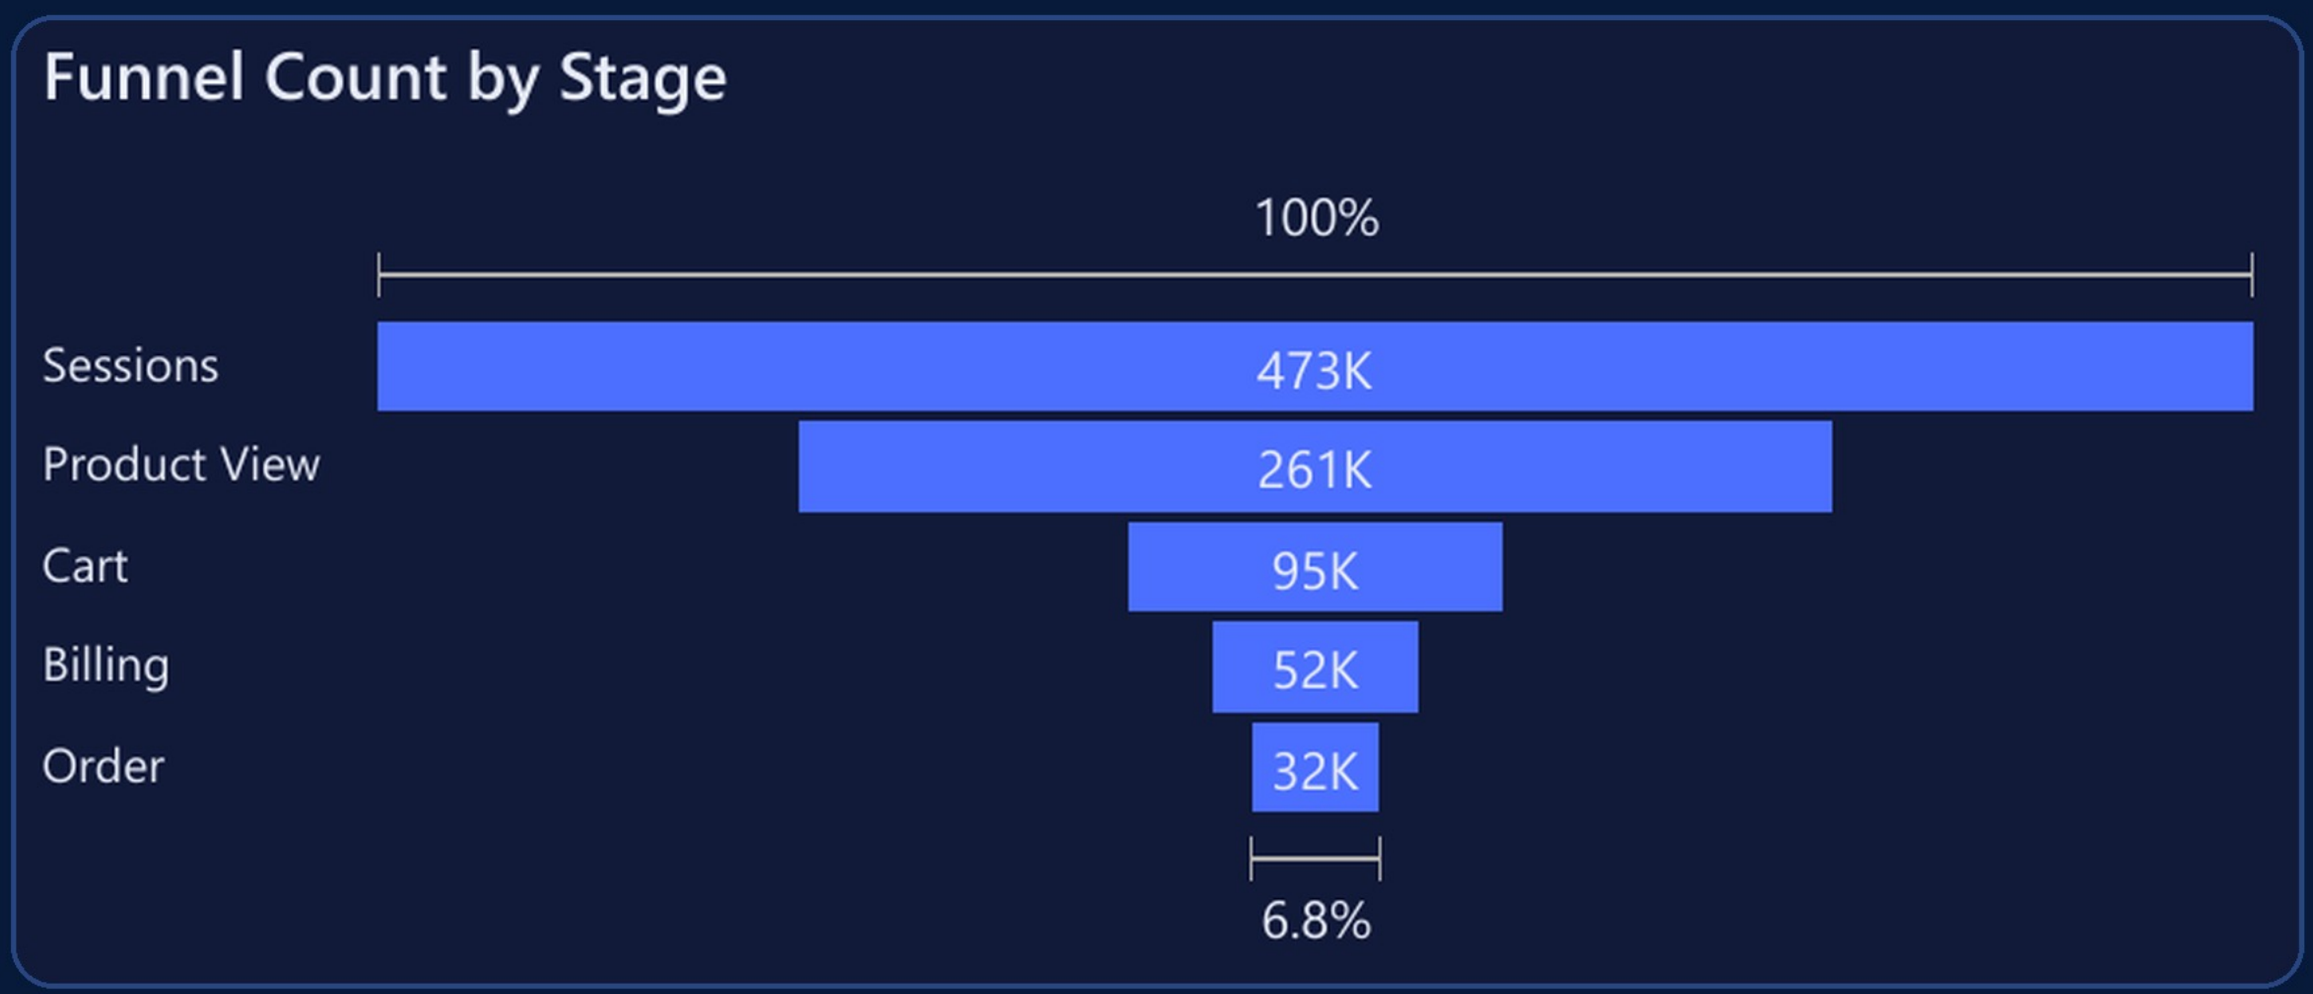

$59.99
Average order value

Gross revenue grew +173.5% in 2014 vs 2013

Trend charts use full months only (Apr 2012 – Feb 2015); Mar 2012 and Mar 2015 are partial.

WEBSITE FUNNEL

Where visitors drop off

55.2%
Session → Product

36.3%
Product → Cart

54.8%
Cart → Billing

62.1%
Billing → Order

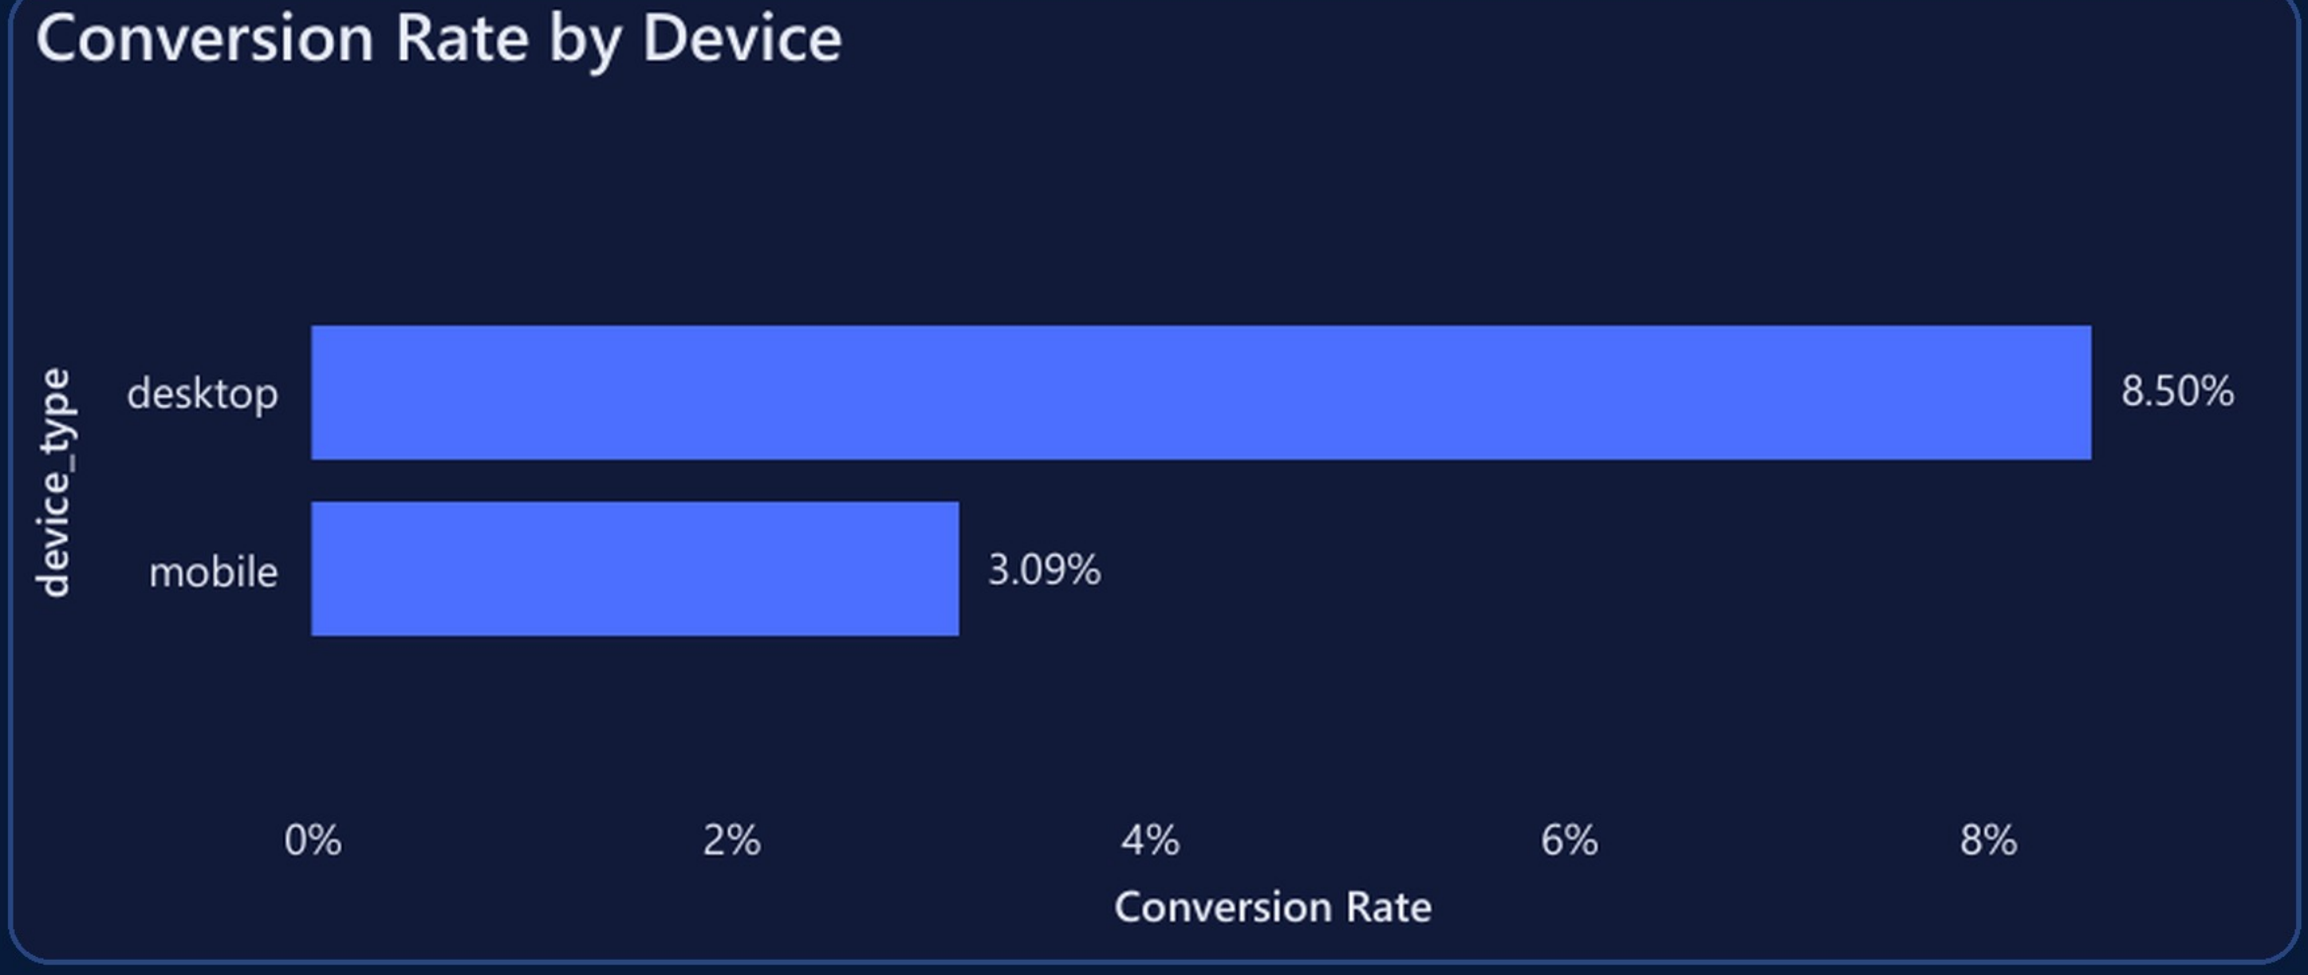

Weakest step: Product → Cart (36.3%).

Only 32K of 473K sessions end in an order (6.8%).

DEVICE

Mobile converts at about one-third of desktop's rate

3.09% vs 8.50%

A 5.41-point gap.

Lifting mobile to 4.5% ≈ +2,055 orders ≈ $123K (illustrative)

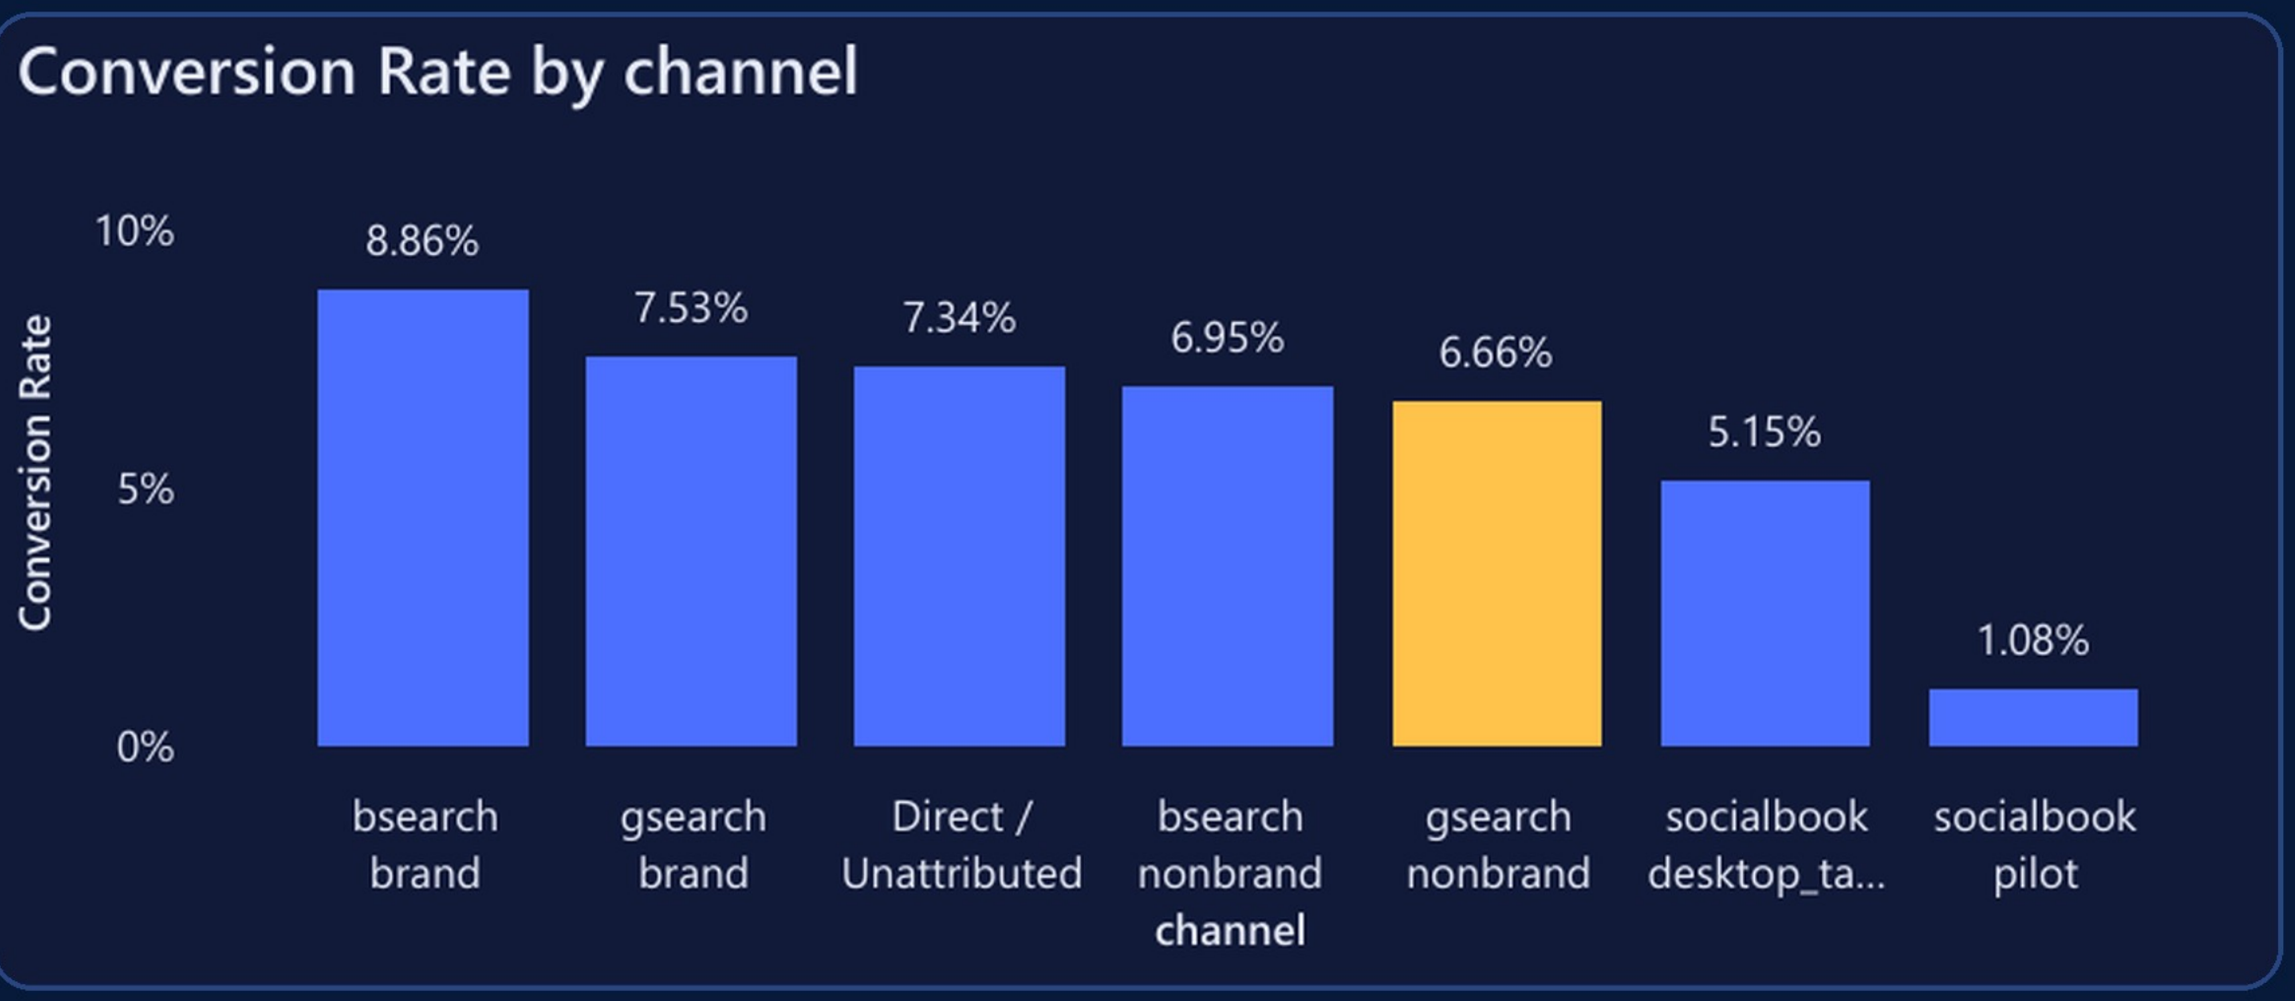

Illustrative: 145,844 mobile sessions × 1.41 pts × $59.99 AOV

MARKETING CHANNELS

One channel carries the business

59.8% of sessions

58.2% of orders come from Google nonbrand search

It converts at 6.66%, just under the 6.83% overall rate.

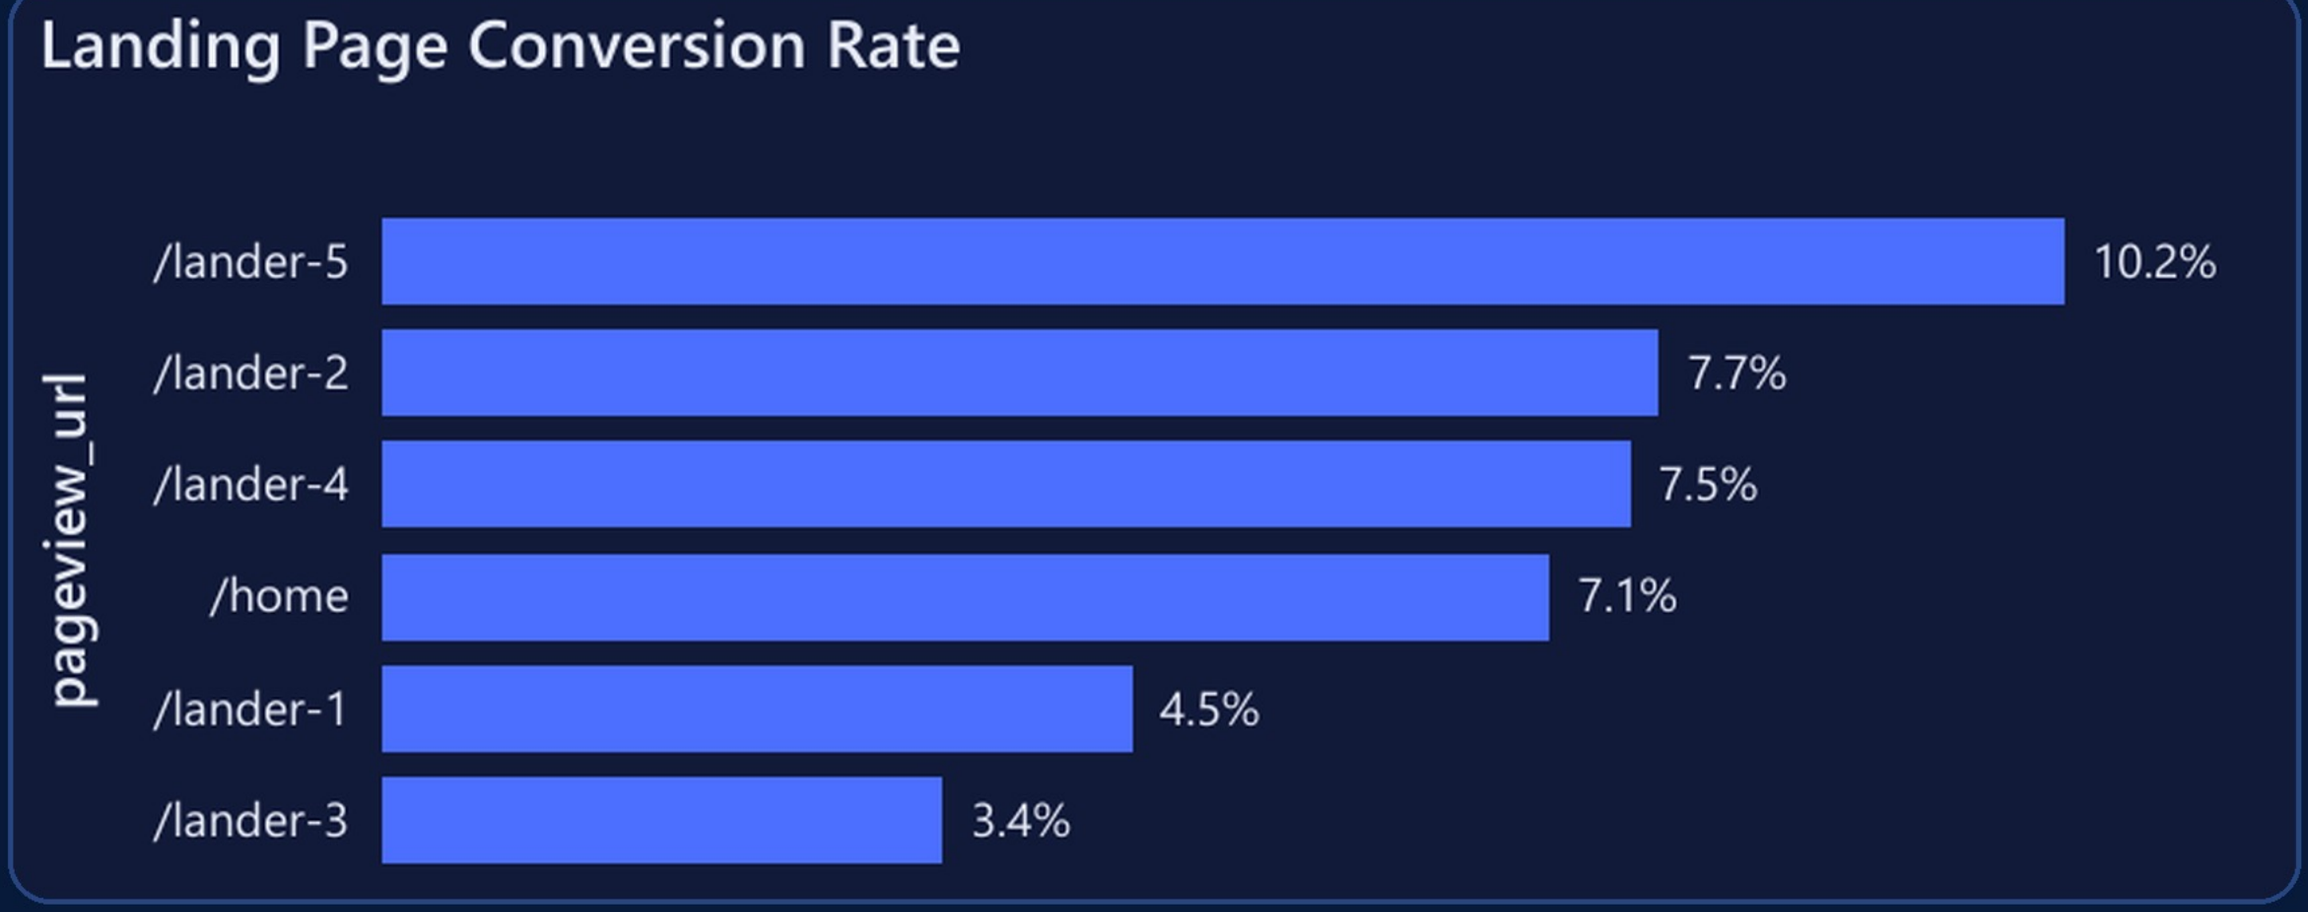

Best: bsearch brand 8.86%. Weakest: socialbook pilot 1.08% (55 orders from 5,095 sessions).

No ad-spend data, so ROI can't be calculated.

LANDING PAGES

Landing pages: a 6.8-point spread

10.2% vs 3.4%

Caveat (unverified)

The pages may have run in different periods, so this is not a clean A/B test.

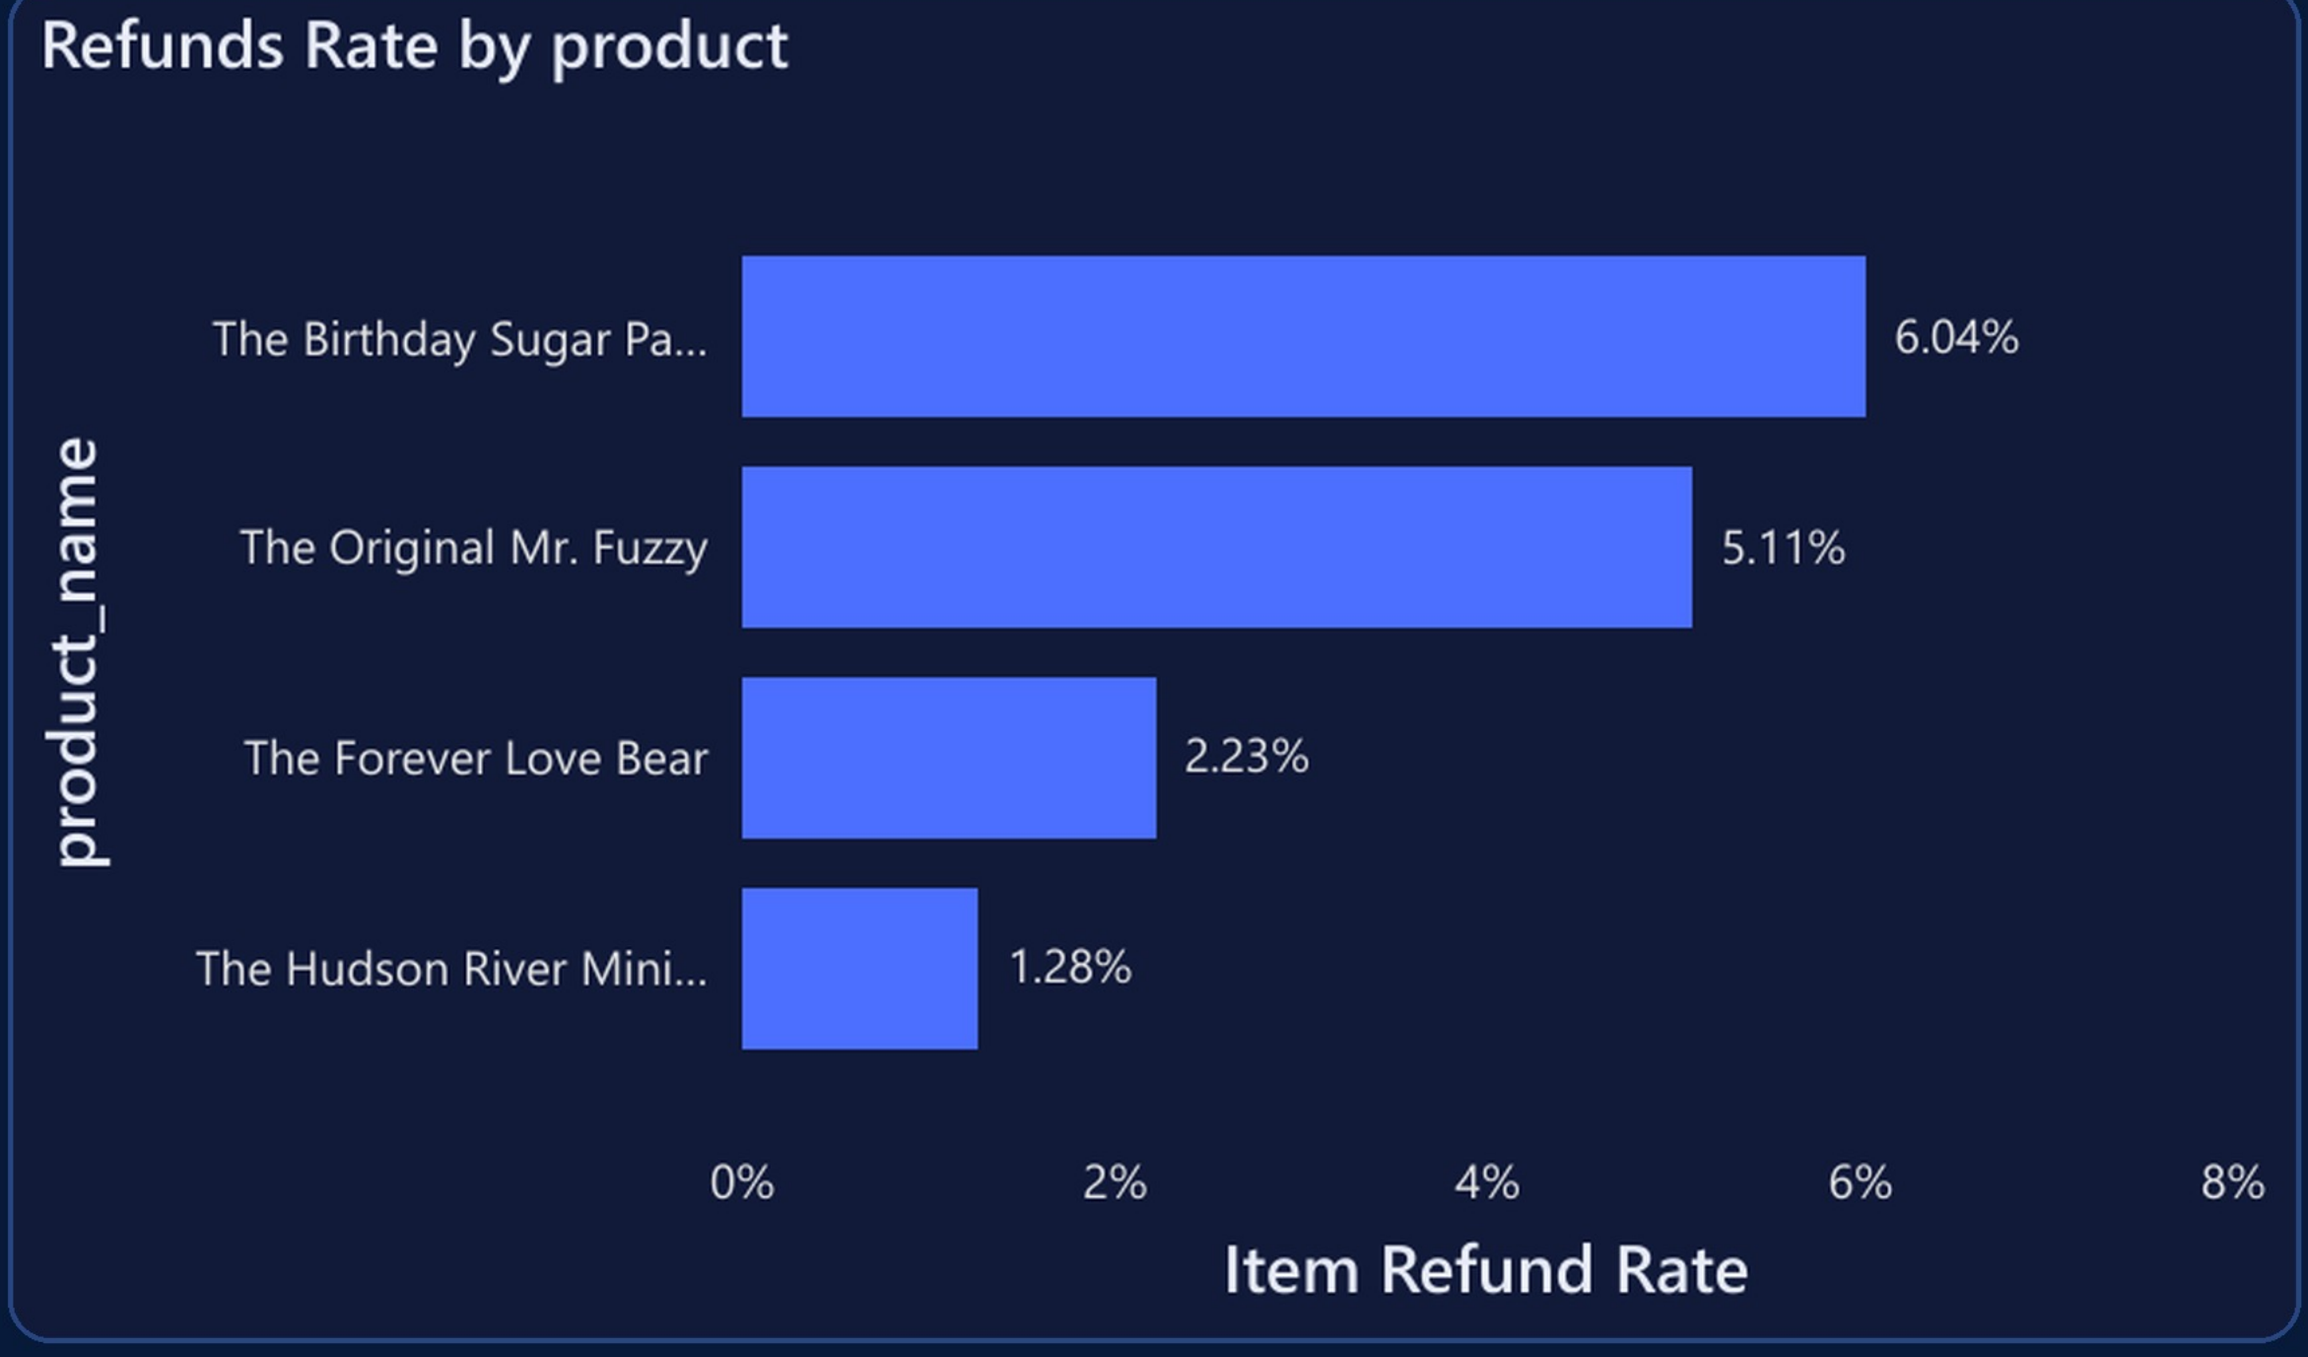

Next step: compare them over the same dates.

PRODUCTS & REFUNDS

Refunds are concentrated in one product

72.46% of refund dollars

Mr. Fuzzy: 62.5% of revenue, $61,838 of $85,339 refunded

Birthday Sugar Panda has the highest refund rate (6.04%).

Refunds cost 4.40% of gross revenue. Matching Forever Love Bear's 2.23% rate on Mr. Fuzzy ≈ $35K (illustrative).

WHAT I'D DO NEXT

Recommendations

1. Audit mobile checkout and A/B test a simpler flow
2. Optimize gsearch nonbrand; grow higher-converting brand and direct channels
3. Compare landing pages over the same dates, then route traffic to the winner
4. Root-cause Mr. Fuzzy refunds first
5. Pause or retest the socialbook pilot with a clear hypothesis
